#	Feature	Student Expectation
1	Conceptual solution (ERD, cardinalities and relationship between different objects) Proper Indentification of entities, primary keys and foreign keys	ERD documentated using Crow feet Chen Notation
2	Physical Database Implementation i.e. right DDL statements (DDL used to construct DB must presented)	SQL DDL statements used to contruct the Database
3	Database tables has been populated with minimum number of tuples (minimum of 20 per table)	SQL DML statements used to insert tuples in the Database
4	Views and how they are relevant to problem domanin(atleast 5 logical views)	SQL statements used to create database Views
5	Stored Procedures and how they are relevant to problem domanin(atleast 10 logical stored procedures)	SQL statements used to create database Views
6	Effort by students to integrate database with web interface. Students must undertand their code	Atleast 5 page website with one of the page posting data to your database
7	Good presentation skills, Punctuality, understanding of the problem and logical solution	
8	The solution/system presented meets objectives and solves real world problem(s)	
9	Ability of students to provide adequate answers to questions asked	
10	Overal Effort to implement the system	

	TOTAL	
group average (x/20)
